Art Unit: 1711

1. It is noted that applicants have claimed propanol within claim 1 and n-propanol within claim 7 as the alcohol species for ester (II); therefore, given applicants' use of different terminology, it is questioned if the propanol species of claim 1 is to encompass species other than n-propanol.

2. Claims 1-4 and 6-9 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicants' specification contains an inconsistency with respect to a central aspect of the invention. Specifically, within the claims and page 3 of the specification, applicants state that the maximum ratio of ester groups in component f) to the number of amino groups in component e) is 1.0, preferably 0.5 to 0.8. However, within page 12 of the specification, applicants state that the maximum ratio of amino groups in component e) to the number of ester groups in component f) is 1.0, preferably 0.5 to 0.8. The two ratios are not equivalent.
